Re: RCW 42.56 Public Records Request – ADA Retaliation & Separation Records ; Re: RCW 42.56 Public Records Request – Leadership Communications & Program Disruption (2019–Present);

Good morning Mr. Kapp,

I have received your correspondence where you have expressed some objections to the handling of your public records request numbered 25-18.

To be clear, I requested clarification on this request in emails sent to you on June 16th, June 18th, June 27th, and again June 30th. You did not respond to my ask for clarification on several points to your request. Therefore I had to interpret how I read your request.

I would also like to state that I did not “miss” a delivery date as I sent you a notification email on June 30th letting you know that the delivery date of your records installment was being moved from July 1st to July 14th.

I am continuing to work on installments of your records request #25-18 and as a reminder the next one is anticipated to be available by August 15th.

I have also received your other email where you raise your objections about receiving records via “flash drive or physical delivery”. I have notified you on multiple occasions that our process when files are too large to send by email is to place them on thumb drives for mailing. This is still electronic or digital format as you have requested. We are also being compliant with the Public Records Act as we are honoring your request “when it is feasible” to do so. Responsive records have been sent to you by email unless they are too large to do so.

Thank you for your correspondence. I have attached both emails here for your reference and convenience.

Best regards,

Jennifer McDaniel
